Outcomes of the GBC Harmonization Teams on Bioanalytical Method Validation

The GBC announces two Webinars presenting key recommendations from the Harmonization Teams. The Harmonization teams were grouped under broad categories of topics related to 1) all therapeutics, 2) chromatographic-based assays and 3) ligand-binding assays. To minimize the number of webinars most attendees are interested in, the topics for all therapeutics have been grouped with the chromatographic assays and ligand-binding assay content producing just two sessions. Each Webinar session will be presented twice to accommodate all regions and each session will take 2 hours.
